

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site name:	Rumpke of Indiana, Inc.
Applicant Name:	Rumpke of Indiana, Inc.
Site location: 3	977 West North Michigan Road Shelbyville, Shelby County
VRP Site No.:	6960905
Project Manager:	Andrea Robertson
Date received:	September 27, 1996
Date completed:	March 7, 2002
Contaminant(s):	Volatile organic compounds, Semi-volatile organic compounds, metals, and polychlorinated biphenyls
Media cleaned up:	Subsurface soil and groundwater
Cleanup Objectives Achieved:	Tier II Nonresidential
Deed/Land use restrictions:	Nonresidential use only and no water wells

Project Summary: The Rumpke of Indiana, Inc. facility in Shelbyville is a truck dispatch and maintenance facility. Rumpke of Indiana, Inc. installed a waste oil underground storage tank in 1991. In 1995, it was discovered the system was leaking and the tanks were removed. Waste oil had contaminated the subsurface and groundwater. Up to five feet of free product was floating on top of the shallow groundwater. A pump and treat groundwater system was installed to remove the free product and an air sparge system was operated to remove contamination from the impacted soils.
